*"Austin is my 'eyes.' He lets
me see the world from a
different angle. And I am
Austin's 'words'..."*

faces and Voices of Autism

PHOTO EXHIBITION

We invite you to experience this unique view into the world of children with autism. The exhibition is an opportunity to learn about autism in a way that is deeper and more meaningful than facts and statistics alone.

Faces and Voices of Autism features individual photographs of children, each accompanied by a short story, or "voice," from the perspective of a person in that child's life. These stories do not focus specifically on the child's diagnosis, but rather on what makes him or her special.

There is tremendous hope in each of these stories, and for the children and families highlighted in this exhibition.

PRESENTED BY:
