Enhancing PBIS to Promote Resilience During Crisis

Susan Barrett, Director,
Center for Social Behavior Supports
Old Dominion University
Center on PBIS
sbarrett@odu.edu
Learning Objectives

1. Participants will be able to use the Return to School Action Planning Companion Guide to SWPBIS-Tiered Fidelity Inventory to assist school teams to enhance their current PBIS effort to support majority of their students, families and staff.

2. Participants will be able to describe school and district level strategies that support adult wellness.

3. Participants will be able to describe how district and school leaders can incorporate trauma-informed practices and social emotional behavior competencies within a Positive Behavioral Interventions and Supports (PBIS) framework.
PBIS is a Mental Health Initiative

**Improved Student Outcomes**
- academic performance (Horner et al., 2003)
- social-emotional competence (Horner et al., 2003)
- social & academic outcomes for SWD (Dunn et al., 2013; Horner, Venable, & Sommers-Hostetler, 2012)
- reduced bullying behaviors (Ritter & Haring, 2009; Horner, Venable, & Sommers-Hostetler, 2012)
- decreased rates of student-reported drug/alcohol abuse (Browne, Comfort, & Hughes, 2012; Browne et al., 2012)

**Reduced Exclusionary Discipline**
- office discipline referrals (Ambrose, Michael, & Legg, 2012; Ambrose et al., 2012; Horner et al., 2003)
- suspensions (Ambrose, Michael, & Legg, 2012)
- restraint and seclusion (Reynolds et al., 2016; Ambrose, Britten, & Young, 2010)

**Improved Teacher Outcomes**
- perception of teacher efficacy (Kern & Montano, 2002; New, Brown, & Meurer, 2002)
- school organizational health and school climate (Ambrose, Britten, & Young, 2010; Ambrose, Britten, & Young, 2010)
- perception of school safety (Horner et al., 2003)

School-Wide Positive Behavior Interventions and Supports
## Using MTSS Logic to Redesign the System.

<table>
<thead>
<tr>
<th>Sample Responses</th>
<th>Using MTSS logic</th>

<tr>
<td></td>
<td>All instructional staff model, teach alongside academic content.</td>
</tr>
<tr>
<td>Train staff on trauma informed practices</td>
<td>Team based training. Time to embed new learning. Time to develop evaluation plan.</td>
</tr>
<tr>
<td>Strengthen partnerships with families and community providers.</td>
<td>Expanded Team uses problem solving logic with school AND community data to inform efforts across all tiers.</td>
</tr>
</tbody>
</table>
PBIS teaching has expanded to a broader range of desired student behaviors:

- social skills,
- emotional regulation,
- problem solving,
- and coping strategies

Instruction used to address internalizing mental health concerns (e.g., anxiety, depression;)
Multi-Tiered System of Supports (MTSS)
Meeting the vast majority of needs within our community.

- We work together as a team and we include people who live and work in our community. We listen to perspective and customize to fit strengths and needs of our community.
- We use data-based decision making that include school level data and community data.
- We decide together what to select. We have a process for the selection & implementation of evidence-based practices (EBP) across tiers with team decision-making.
- We make sure we use information so our community members get help early- and quickly
- We monitor progress and continue to improve to meet needs of all.
- We increase dose of support for members who need additional help.
- We use coaches to ensure we are supported.
Planning a Roadmap

• Create affirming relationships within a positive, safe, predictable school climate
• Reconsider allocation of time (school calendar, school schedule)
• Consider more nimble, effective staffing models (e.g., small learning communities)
• Focus on social emotional behavioral well being
• Go Upstream to identify & practice pivoting between different teaching & learning contexts

(Chiefs of Change, 2020; Darling-Hammond & Cook- Harvey, 2018)
Who and where are we capturing the action steps from today? Translating to current context.. How will our team apply these components based on our situation? Our context? Our culture?

**TAKE ACTION**
Current Context

- **The U.S. has reported more than 10 million coronavirus cases and at least 230,383 deaths.**
  - **according to data from CDC**

- **The U.S. unemployment rate has surged to above 7.9% because of the pandemic, with nearly 32 million Americans now receiving unemployment benefits**
  - according to data from Labor Department.

- **ANALYSIS ON UNEMPLOYMENT PROJECTS 40-45% INCREASE IN HOMELESSNESS THIS YEAR**
  - Columbia University economist estimates 800,000 Americans could be experiencing homelessness by summer

Annie Nova, CNBC

Community Solutions
“Since the first week in June, the US Census Bureau has asked households that reported having insufficient food whether it was often, sometimes, or never true that in the last 7 days the children (under 18 years old) living in your household “were not eating enough because we just couldn’t afford enough food.” 16.5 percent of households with children reported that it was sometimes or often the case that the children were not eating enough due to a lack of resources during the week of June 18-23 2020, 5.5 times the 2018 rate of 3 percent (the most recent annual data from the Current Population Survey).”
Statewide High-Level Analysis of Forecasted Behavioral Health Impacts from COVID-19

Washington State Department of Health, Updated April 16th, 2020

- A surge in behavioral health symptoms; likely to be seen in phases
- Anxiety related issues becoming prevalent immediately through next 2-3 months,
- Increase in depressive symptoms peaking around Nov/Dec 2020
- Highest risk of suicide likely Oct-Dec 2020
- More people with behavioral health concerns were NOT receiving treatment (aprx 700,000) prior to the outbreak than the # of Washingtonians who were receiving treatment (aprx 695,000)
<table>

                          • Build calming routines for sleep.  
                          • Build routine for daily exercise. |
Upstream Solutions

(A Public Health parable, credited to Irving Zola, and illustrated in Upstream by Dan Heath)
Mental & Social Emotional Wellbeing

- Nested within health and safety protocols, instruction, operations
- Increase need
  - Overwhelmed the system before
  - We can’t hire our way out of this without transforming how we deliver mental and social emotional health
- All Hands on Deck
  - Social emotional leaders help increase capacity
Worry

*Learning will not occur unless emotional needs are met*

- Crisis + Budget Cuts = Stress
  - Range of responses
  - Staff, families, students are scared
  - Messages from our local leaders critical
  - We may want to retreat to our silos – we seek comfort in routines and old contingencies
  - Stress and overwhelmed workforce = increase implicit bias and over use of exclusionary discipline = increase inequities
  - Maslow will go out the window upon “return”
You’ve got to “Maslow” at the Individual level and Organizational Level before you can “Bloom”
What does science tell us about wellbeing?

• Brain forms and changes across life span
• Continuous interplay between body, mind, spirit, behavior and genetics.
• Sensitive periods
  • Birth to 2
  • 4-6 years
  • Adolescence
• We can intentionally train our brains to improve well being and greater good.
• “Well being is a skill”

Center for Healthy Minds,
University of Wisconsin Madison
Designing Strategy

How do we expand our idea of what mental health is...
  • Not just someone in an office getting supports from a “specialist”
How will we adjust our greeting strategy?
“Air High Fives”, “Air hugs”

How do we adjust in a virtual/distance learning environment?
Greeting is the opening routine!
How will we adjust being social at a distance across our environments?
All Hands on Deck

• We want to know what is expected of us- consistent, predictable routine
• We want to the tools and resources to do our jobs well.
• We want people around us who are supportive.
• We want voice and choice.
• We want information and prep time to make changes.
• We want to feel sense of belonging and purpose.
Mental health= strategies and skills for coping

• Daily Calm
  • Time to be still. Get comfortable, turn off lights, calming music
  • Time for breathing: slow, deep belly breaths

• Daily Activity and Movement
  • Walks, exercise, outdoor time

• Biology Breaks
  • Stand, stretch, move, mind break
Mental Health For ALL

• Positive Greetings
• Positive Connections across the day
• Routines that include calming strategies, daily physical activity, biology breaks
• Consistent, predictable, safe and equitable learning environments
• Dependable and positive relationships

• Promotes resilience and healthy brain functioning in children who have experienced trauma (Sciaraffa, Zeanah, & Zeanah, 2018)
• All of these qualities are important to the healing of students who have experienced trauma.
Design Strategy
Decrease Stigma,
Fit with current context
match with local culture and context

• Marketing and Branding
  • Building a Resilient Community
  • Project Wellness
  • Care Bears
  • Care Teams
Now

• Design a System of Support for Staff

  Focus on de-stressing staff
  • Clear, concrete expectations, procedures and routines
  • Direct instruction
  • Opportunity to practice, plan and build fluency
  • Get feedback and input from staff, adjust, improve
  • 5:1 feedback ratio
“I am overwhelmed”

• Trauma
• Social emotional learning
• Wellness
• Mental health
• Grading policy
• Attendance policy
• Lost instructional time
• Impact of isolation

Integrating a Trauma-Informed Approach within a PBIS Framework

Lucille Eber, Midwest PBIS Network
Susan Barrett, Old Dominion University
Nicholas Scheel, University of South Florida
Ami Flammini, Midwest PBIS Network
Katie Pohiman, Midwest PBIS Network

The purpose of this Guide is to describe how district and school leaders can incorporate trauma-informed practices within a Positive Behavioral Interventions and Supports (PBIS) framework. This ensures that the investments in training school personnel about trauma can be integrated into a system that links these efforts to student outcomes. Recommendations are included for how to adjust the PBIS framework to support trauma-informed practices.

Introduction

Over the past decade, youth-serving systems have increased their focus on childhood trauma and its impact on the mental health of children and youth (Hanson & Lang, 2016). Educators, following the lead of child welfare and mental health organizations, have intensified efforts to ensure that all teachers and administrators work in a system that provides accurate information about the prevalence and impact of trauma, are provided training and coaching around trauma response, and have a clear understanding of their role in supporting students who have experienced trauma. Although schools are investing heavily in professional development about A Trauma-Informed Approach: "A program, organization, or system..."
Are kids showing up?

• In person or virtually?
• If not, why not?
• Do students have access to devices, the internet, a helpful adult if learning at home?
• Have we designed a system of support for our staff? Are staff positive, welcoming and using proactive strategies with our students?
• Are we providing a learning experience worth showing up for? Have we included our students, families and staff to provide input on how to improve?
Pause and Reflect

• With your team, use the action planner to discuss ways you are making sure we are working together to design a system of support for ALL staff. We increase our collaboration and design a system everyone wants to participate in so we increase the likelihood our students will show up.

• Are staff showing up?

• Are students showing up?
Designing Safe and Effective Environments
“Getting back to a routine is one of the pillars of trauma recovery”

- We will manage stress if we develop Common Expectations, Language, Routines across contexts (distance and face to face)
- *Input required!*
- Words reflect stakeholders cultural identity/norms
  - Predictable and consistent
  - Explicit instruction
    - Positive and corrective feedback
  - Increase in personal safety and universal precautions
  - Compassion, patience
- All people and especially people impacted by trauma thrive from established expectations
  - For students impacted by trauma, high expectations show the student they are capable and worthy
Are students demonstrating expected behaviors? Are staff using instructional approaches to support students?

- Have we explicitly teaching expectation, routines and procedures? Are we using common teaching matrix for in-person or virtual instruction given the context of the pandemic?
- Have teachers revisited their in-person or virtual classroom expectations?
- Have we incorporated calming strategies and other social emotional skills into our matrix?
- Have we taught all the expectations to fluency?
- How do we reinforce in virtual learning environment?
- How do we discourage in virtual learning environment? How do we offer grace?
- How will we re-teach?
- How do we monitor unexpected behaviors in the spirit of providing supports needed?
## School Matrix Example 2020

</table>

**How can my teachers support me?**

**How can my family support me?**
Are students engaged?

- Do we have common definitions for what engaged look like at school, on Google classroom/ Zoom?
  - *Caution with use of camera*
- Have individual teachers defined what engaged looks like in their classroom, face-to-face or virtual?
- Have students been taught the engagement expectations?
Relationships and Connectedness

• First 2-3 weeks
How will we train and support our staff to build care and connections with everyone?

• Back to School, Back to Basics: Consistent health/safety procedures across ALL schools.

• Week 1 “Know their name, know their story”
  • Focus Area: Perspective Taking, Calming strategy, Teaching Expectations, Routines and Procedures

• Week 2 Relationship Skills, Differentiating Expectations and Routines across settings- preparing for distance learning

• Week 3 Relationship Skills: Working together as a team
Belonging

“Belonging is the innate human desire to be part of something larger than us. Because this yearning is so primal, we often try to acquire it by fitting in and by seeking approval, which are not only hollow substitutes for belonging, but often barriers to it. Because true belonging only happens when we present our authentic, imperfect selves to the world, our sense of belonging can never be greater than our level of self-acceptance.”

(Brown, 2010)

Behavior = form of communication
Paying attention to what we do.
How do WE “heal the hurt” starting with...
“Know their name, know their story”
“I hear you, I see you, how can I help you?”
Prioritize the first two weeks

• Focus on building community
  • Prioritize building strong, positive relationships
  • Fun, use games
  • Create predictable, safe, positive environment
  • Uncovering academic and social emotional behavioral needs
How will we train and support our staff to build care and connections with everyone?

• Back to School, Back to Basics: Consistent health/safety procedures across ALL schools.

• Week 1 “Know their name, know their story”
  • Focus Area: Perspective Taking, Calming strategy, Teaching Expectations, Routines and Procedures

• Week 2 Relationship Skills, Differentiating Expectations and Routines across settings- preparing for distance learning

• Week 3 Relationship Skills: Working together as a team
What does this look like in distance settings?

- Regular Check-ins
- Community Circles
- Spark Lessons
- One-pagers, Strength finders
- Paper Tweets
What are we doing to make sure all students and staff are connected and known?

• Set priorities
• Use Small Learning Communities
• Making sure every student is Known (Teacher-Student Connection)
• Empathy & Perspective-Taking
• Intentional Greetings (check in)
• Intentional Good Byes (check out)
• 5:1 Positivity Ratios
• 2x10 Strategy (for some, a few)
• Creating Data to track engagement
Current Data?

• % of students engaging in distance learning
• % of families and students receiving food support
• % of families personally impacted
  • Family member ill
  • First responder/essential worker
• % of students and staff not returning FTF
  • Underlying medical conditions
  • Living with at risk family member
  • other
Parent Screener for ALL students transitioning to Middle school

Missoula, MT

School Readiness Check-In
Welcome to the new school year!
We’re checking in with you to learn about your student’s strengths and needs for support at school.
By answering these questions, you can help us start the year off right!

Please rate your student in the following areas:

<table>
<thead>
<tr>
<th>Behavior</th>
<th>Doing Great</th>
<th>Some Concern</th>
<th>Serious Concern</th>
<th>Need Support?</th>
</tr>
</thead>
<tbody>

</tbody>
</table>
Small Learning Communities

• Consider strategic reconfiguration of staff models
  • Maximize high quality instruction
  • Maximize connections with individual students
• Consider teacher and staff strengths, preferences
• Consider student voice/choice
• Allows community building with familiar faces

How might you lean into this structure?

(Chiefs for Change, 2020)
Are staff well and are our students gaining (academic/social/behavioral) benefit as a result of attending school?

- How will we (teachers, staff and teams) monitor our success?
- Staff wellness and student learning?
- How will we aggregate this data to determine if our plan is working?
Do you know what your staff need?

- % of staff who feel connected
- % of staff who meet attendance requirements
- % of staff who feel like they can manage their workload
- % of staff who feel like they have skills to do their job well
Pick your priority data points

- What do you need to know to prepare for SY 2020-2021?
Pause and Reflect

• With your team, continue to use the action planner to discuss ways your are making sure we working together to design a system of support for ALL staff. We increase our collaboration and design a system everyone wants to participate in so we increase the likelihood our students will show up.

• Are students and staff demonstrating expected behaviors? Are we using instructional approaches to support students, staff and families?
• Are students and staff engaged?
• Are staff well and are our students gaining (academic/social/behavioral) benefit as a result of attending school?
